“I get to build stuff for my (Drupal)  
Utility Belt!”

# What is the Features Module?

Drush FU!

Tee hee!

# What is the Features Module?

No, really, “drush fu”:

```
[LOCAL] vagrant@webdev-vagrant:htdocs$ drush help fu
```

```
Update a feature module on your site. The option '--version-set=foo' may be used to specify a  
version number for the feature or the option '--version-increment' may also be used to increment the  
feature's version number.
```

Arguments:

feature

A space delimited list of features.

Options:

--version-increment  
--version-set

Increment the feature's version number.  
Specify a version number for the feature.

Aliases: fu
